Explanations of policies for each "yes" checked above:

Assistance groups that have utilities included in the rent, but are not billed separately for heating costs must be evaluated for LIHEAP eligi bility. If a client applies for LIHEAP and indicates that their utility are included in their rent, the worker will request verification of those said util ities. This can be done via phone call, rent receipt, lease or contract. We also want to give priority to households that have someone in the househ old that is elderly, disabled, or there is a young child in the home that is age five or younger as these are the most vulnerable to the cooler temperat ure in the winter and the hotter temperature in the summer. We also want to give priority to those that have higher energy burdens as they may no t have the extra money to pay for the higher heating bills.

Determination of Benefits 2605(b)(5) - Assurance 5, 2605(c)(1)(B)

2.4 Describe how you prioritize the provision of heating assistance tovulnerable populations, e.g., benefit amounts, early application periods, etc.

Those that received LIHEAP last year that have someone that is aged, disable or a child in the home age five or under will be sent an appli cation at an earlier time than those that did not receive LIHEAP benefit last year, thus giving these individuals/household a longer time to turn the se application in.

A crisis is defined as being without home heat or being in danger of not having home heat and not having the resources to resolve the crisis without financial assistance. If the crisis threatens the loss of a utility, a past due bill or termination notice is required to be submitted with the appl ication. if the home heating crisis is the result of a natural disaster, state and/or national public health emergency, payments may be issued to previ ously approved households. Under these circumstances, a past due bill, termination notice, or face-to-face interview may not be required. If there is an intake period in which an application is required, a past due bill or termination notice may be requested, but face-to-face contact may be waiv ed. If the heating unit is no longer functioning or is considered unsafe heat, the client can be evaluated for the Emergency Repair and Replacement Program. If a client can no longer use the heating source due to a medical condition, i.e., a client is now disabled and cannot load a wood stove, the n the heat source is considered unavailable. Households with unavailable heating sources are categorized as being in crisis, as well.

A client also must have no way to resolve the crisis, i.e., having no money to pay the bill or having to pay for repair/replacement of a malfunctioning heating/cooling unit. A disconnect notice is required to verify that the utility is in danger of being terminated. If the heating unit is not functioning, the client can be evaluated for the Emergency R epair or Replacement Program. Life-threatening crisis must be documented in all cases.

Explanations of policies for each "yes" checked above:	

The client must have a past-due bill or termination notice to be eligible for crisis assistance. The client must verify the lack of resources to eliminate the crisis. Lack of resources can be verified by the client to validate their income, which would show that he/she does not have sufficient income to eliminate the termination. If the client reports no income then the client must fill out a zero income form. For the Emergency Repair a nd Replacement portion of the crisis assistance, the client would have to meet the income guidelines and also have a non-working or unsafe heatin g source or have no heating source at all, to be eligible. For the repair or replacement of the air conditioner units, the client would have to be income eligible, have a non-working or improperly functioning unit and have someone in the household that is age 60 or over, or someone that is disabled, or a child in the home that is age five or under. The Agency can accept a doctor's statement to verify the medical condition for the cooling rep air or replacement assistance, if the client is not considered disabled by the Social Security Administration.

	Other - Describe: For the Emergency Repair and Replacement program we can pay up to \$7,000 for the repair or replacement of hea ting and or cooling units. The LIEAP coordinator has the ability to approve an amount higher than \$7,000 if there are spe cial circumstances. This is done on a case-by-case basis.				

Crisis Requirements, 2604(c)

4.10 Do you accept applications for energy crisis assistance at sites that are geographically accessible to all households in the area to be served?

💽 Yes O No Explain.

Clients who require crisis assistance must be interviewed in a local DHHR office. There are fifty-four county offices to accommodate this need. If a client is not physically able to come into the local office the client can appoint someone to apply on his/her behalf or arrangements can be made for a worker to go out in the field to accommodate the client if necessary.

4.11 Do you provide individuals who are physically disabled the means to:

Submit applications for crisis benefits without leaving their homes?

• Yes O No If No, explain.

Travel to the sites at which applications for crisis assistance are accepted?

• Yes O No If No, explain.

If you answered "No" to both options in question 4.11, please explain alternative means of intake to those who are homebound or physically disa bled?

If needed, the Agency can provide intake service through home visits or by telephone for those that are physically unable to come i nto the county DHHR offices and cannot designate someone to apply on his/her behalf.

LOW INCOME HOME ENERGY ASSISTANCE PROGRAM(LIHEAP) MODEL PLAN SF - 424 - MANDATORY

Section 10: Program, Fiscal Monitoring, and Audit, 2605(b)(10)

10.1. How do you ensure good fiscal accounting and tracking of LIHEAP funds?

Federal funds awarded to West Virginia are committed and identified in WV (Our Advanced Solution with Integrated Systems) OASIS. LI HEAP customer payments are also entered into OASIS and daily payments are tracked and monitored to determine that expenditures do not excee d the amounts that are awarded. The state's Recipient Automated Payment and Information Data System (RAPIDS) is the benefits issuance proce ssing program that workers access to determine customer eligibility for LIHEAP. The system provides individual approvals and daily batch approvals which allow for dual controls. Benefits are approved in RAPIDS and can be sent to OASIS for payments to utility companies, bulk fuel vend ors and to clients.

Weatherization funds are not transferred to other state agencies. The West Virginia Development Office (WVDO) runs the Weatherization program for West Virginia. The WVDO is allotted 15% of the total grant funds.

The DHHR Finance department tracks all funding spent for this grant. This includes refunds, weatherizations, administration, heating assi stance, crisis and carryover.

Audit Process

10.2. Is your LIHEAP program audited annually under the Single Audit Act and OMB Circular A - 133?

10.3. Describe any audit findings rising to the level of material weakness or reportable condition cited in the A-133 audits, Grantee monitoring as sessments, inspector general reviews, or other government agency reviews of the LIHEAP agency from the most recently audited fiscal year.

Section 16: Performance Goals and Measures, 2605(b) - Required for States Only

16.1 Describe your progress toward meeting the data collection and reporting requirements of the four required LIHEAP performance measure s. Include timeframes and plans for meeting these requirements and what you believe will be accomplished in the coming federal fiscal year.

West Virginia will collect and report on LIHEAP performance measures data to ensure that the Agency is targeting and serving and provid ing bill payment assistance to households with the highest energy burden. The Agency will concentrate on restoration and prevention of loss, ener gy source, energy burden, income and imminent risk of running out of fuel. West Virginia has defined "Imminent Risk" as being without, disconn ected, or within three days of being without heat. The Agency's eligibility system currently collects annual household income, annual LIHEAP be nefit, main fuel type and whether or not the client has to pay for electricity or electric services. The Agency is also working with the major PSC-r egulated utility vendors to capture annual energy usage (if applicable), prevention of loss and restoration of service.

West Virginia will also work with the 54 local offices to ensure that workers are completing the LIHEAP screens out correctly in our eligi bility system and that they are documenting this information correctly. From our past Statewide Single Audits it was noted that workers did not k eep copies of the utility bills for all case files or a portion of the LIHEAP application was not properly stored in our online database. We are takin g measures to improve this based on training and desk guides for our eligibility workers.
