2.4 Describe how you prioritize the provision of heating assistance tovulnerable populations, e.g., benefit amounts, early application periods, etc.

Households containing one or more members of the targeted priority groups (elderly, disabled, young children) are eligible for one additional \$100 benefit payment per household.

The applicant's energy burden is automatically calculated using the Hancock Energy Software (HES). The highest total energy cost (TEC) is divided by the total household monthly gross income to determine the percentage of the household income used for energy costs.

The applicant's benefit amount is determined using a benefit matrix. Households with zero income are eligible to receive the maximum benefit payment allowed for their family size.

Eligible households can receive two non-crisis benefit payments, during a twelve-month calendar period.

In selecting a local agency, preference is given to any CAA or other public or nonprofit entity which has, or is currently administering, an effective program under any low-income energy assistance or weatherization program.

Program effectiveness is evaluated by considering the following factors including, but not necessarily limited to:

- 1) The extent to which the past or current program achieved or is achieving LIHEAP goals in a timely fashion;
- 2) Meeting the fiscal requirements established in regulations and state polices;
- 3) The quality of service delivered by the local agency;
- 4) The number, qualifications, and experience of the staff members of the agency; and
- 5) The location and proximity to the vacant territory.

Local agencies responding to a formal request for proposals are required to attend a hearing conducted by LHC to present their proposal and answer questions.

Exceptions are allowed under circumstances when a new vendor or existing vendor is not set up to receive payment directly from LHC and/or refuses to accept a pledge on behalf of an eligible applicant. The Contractor may request reimbursement for the payment made to prevent a shut-off or disconnection.

The Hancock Energy Software (HES) generates a Client Qualification Notification letter, which is provided to the client at the end of the application process.

9.3 How do you assure that the home energy supplier will charge the eligible household, in the normal billing process, the difference between the actual cost of the home energy and the amount of the payment?

The Vendor Agreement contains a provision to assure the vendor will not discriminate, neither in costs or goods supplied nor the services provided, against the household on whose behalf benefit payments are made.

9.4 How do you assure that no household receiving assistance under this title will be treated adversely because of their receipt of LIHEAP assistance?

The Vendor Agreement contains a provision to assure customers receiving assistance from the LIHEAP will not be treated adversely because of such assistance under applicable provision of State law and public regulatory requirements.

Local Adminstering Agencies / District Offices: 4 On - site evaluation ~ Annual program review ~ Monitoring through central database ~ **Desk reviews** < Client File Testing / Sampling Other program review mechanisms are in place. Describe: 10.6 Explain, or attach a copy of your local agency monitoring schedule and protocol. Louisiana Housing Corporation (LHC) has adopted a systems approach to monitoring Contractors for compliance with applicable regulations and achievement of performance goals. Program activities are monitored both electronically and by conducting on-site visits annually. The State mandated software is used to record application input and monitor Contractors' production, i.e., how many applications are taken in a given time frame; how many of those applications were Non-Crisis applications; how many were Crisis Applications; how many households were served; and how many priority members were included in those households. We are also able to monitor the rate of benefit delivery to the specific service area. This information is utilized to not only monitor the rate of service delivery but also the areas being served. Those areas can be identified within a service provider's geographical service area, needing extra attention and outreach. During the on-site monitoring visits, the physical files are reviewed for documentation of various program mandated activities, such as: (A) Written policies and procedures that prohibit discrimination in both service delivery and employment, (B) Compliance with Minimum Wage laws, (C) Written policies regarding grievance procedures for both applicants and employees, (D) Written policies regarding providing services to eligible applicants on a first come, first served basis, (E) Written policies that document adherence to written Program Guidelines approved by Louisiana Housing Corporation, (F) Documentation of employee training on program guidelines, (G) A review of various documents that demonstrate program outreach activities including newspaper ads, radio and/or television advertising, copies of any printed material distributed in the community to applicants and potential applicants, (H) A review of Client Education material distributed to applicants regarding energy conservation activities, (I) A review of a random sample of applicant files to verify the collection of required support documentation from eligible applicants, including income, vulnerability of the client for the cost of the energy bill, confirmation of residence at the service address indicated on the bill, copies of Social Security Cards or other government documents that contain social security numbers for each member of the household being served. Eligibility and benefit determination is handled through the web-based computerized application system adopted by the LHC. The program is designed to calculate benefits based on parameters that are entered at the state level and that are unalterable at the service provider level. Benefit calculations are based on income levels for each household, the number of eligible household members, and the identification of priority members of the household, i.e., persons over 60 years of age, persons disabled, or persons five years old or less. The benefit calculation is totally automated requiring only data input from the agency provider. Eligibility is also determined by the same system utilizing social security numbers of applicants and flagging those applicants or household members that may have received a benefit within the prohibited time frame. Applicants may currently apply for non-crisis benefits once every six months, and if necessary, applicants may also apply for a crisis benefit once in a twelve month period. 10.7. Describe how you select local agencies for monitoring reviews. Site Visits: LHC, as the state grantee, is required to conduct annual on-site compliance monitoring visits to all LIHEAP contractors. **Desk Reviews:** 

LHC staff conducts ongoing desk monitoring of agency reports, budget tracking and statistical reports, and rate of expenditures.

3. For grantees other than individuals, Alternate I applies.

4. For grantees who are individuals, Alternate II applies.
